7. (currently amended) A method of performing cardiac ablation comprising:
  - (a) providing an ablation device in a chamber of the heart of a mammalian subject such that the device is in an operative configuration with a distal side of the device facing toward a region of the cardiac structure to be ablated; and
  - (b) while the ablation device is in said operative configuration, injecting a contrast medium into said chamber the subject on the distal side of said ablation device and obtaining one or more images depicting the contrast medium in at least a portion of the cardiac structure so as to visualize the position of the ablation device relative to the cardiac structure.
8. (canceled)
9. (currently amended) A method as claimed in claim 8-7 wherein said contrast medium is an x-ray contrast medium and said step of obtaining said images is performed by x-ray imaging.
10. (currently amended) A method as claimed in claim 8-7 wherein said chamber of the heart is the left atrium and wherein said steps of injecting contrast medium and obtaining images are performed so that said images show contrast medium in the atrium and in at least one pulmonary vein.

82. (canceled)

83. (new) A method as claimed in claim 10 wherein the step of injecting contrast medium into the subject includes injecting the medium so that the medium advances forwardly into at least one pulmonary vein and the medium is carried by blood flow back toward the ostium of the vein and into said chamber around said ablation device.

84. (new) A method as claimed in claim 10 further comprising the step of maintaining the ablation device abutting the heart wall in the vicinity of a pulmonary vein ostium during the step of injecting the contrast medium.

85. (new) A method as claimed in claim 84 wherein the step of acquiring images includes acquiring one or more images while the ablation device abuts the heart wall.

86. (new) A method as claimed in claim 84 further comprising the step of retracting the ablation device away from the heart wall after injecting the contrast medium.

87. (new) A method as claimed in claim 86 wherein the step of obtaining images includes obtaining one or more images after retracting the ablation device.

88. (new) A method as claimed in claim 10 wherein the method is performed without forcibly engaging a structure with the wall of the pulmonary vein.
